

I came to Ofir after a very long series of many different treatment that did not solve my post operation knee problems. I was suffering great pains in both knees, the one operated on and the other one as a result of a very bad rehabilitation procedure performed abroad.

Ofir performed an extensive checkup and interviewed me. He then proceeded to set me up with an intensive treatment to begin with where he surprised me when he treated my hips and lower back on top of my knees. I was quickly up and running (literally started running again) with in a few weeks, and then he passed me to a maintenance program of only a couple times a month, reduced now to only once a month. I am back to full sportive activity and I am amazed at the length of time Ofir dedicated to each session and his deep knowledge of the body as a whole. Having been in treatment by 8 different institutions, sport experts, western doctors and Chinese doctors over the last 2 years who did not solve my problem, I have nothing but praise for his ability and professional conduct as well as positive spirit and welcoming smile. Keep up the good work

Take care
Dave
